

Project Management Fundamentals

Course Length: 2 Days / 14 PDUs

Course Description:

This seminar provides an introduction to Project Management and the core concepts and best practices used in this discipline. During the course, project management “best practices” will be introduced, and put into context through various exercises, scenarios and case studies. ***The course is designed as a practical workshop, and learning by doing is a key component.*** As such, class participants will be asked to work on sample “projects” and be assigned deliverables to produce within a specified time frame. After each exercise, a review will be conducted offering comments and suggestions for improvement.

Attendee Profile:

Project Team Members, Project Leaders, Team Leaders, Project Managers, Line of Business Coordinators, Business Analysts and anyone who is responsible for the delivery of projects in a cross-functional environment is a candidate for this program.

Course Goals:

- Develop a foundation in core project management concepts.
- Apply project management tools and techniques to managing real-world projects.
- Discover and apply proven project risk management processes.
